Dear DTT team,

I hope this message finds you well. I'm writing to express my gratitude for granting me another opportunity to compete for an interview with your esteemed company.

Regarding the Assignment:

Concerning the minor fixes, which only took me a few minutes each to address, I have no significant comments to make. I didn't encounter any unexpected obstacles, and I promptly resolved the issues. I denoted these corrections in the hour log with a time allocation of 0 hours. Additionally, I created an additional field at the end to track them all together.

I encountered some challenges while working on the active tab. Understanding how to utilize v-slot and slots in general to create the active tab proved somewhat tricky. However, I managed to devise a solution that I believe aligns with your expectations.

In reference to the separated components, I successfully implemented the sorting buttons and the search bar. While I contemplated creating one or two more components, no other ideas came to mind, except for the listing card. I hesitated to pursue this idea, fearing it might complicate the implementation of the recommended houses component.

The Pinia aspect of the assignment reminded me of Redux, so I didn't encounter any significant obstacles there. While my implementation may not be flawless, I am committed to improving it in the near future. I am planning to delve deeper into Vue in the coming days.

Another area where I encountered some difficulties was the image input. It is possible that there are still a few bugs present. I might be lacking some crucial information on how to streamline this process efficiently. I devised several custom solutions for handling image input, but I am eager to learn more about achieving greater efficiency in this aspect.

I am eagerly looking forward to hearing your feedback on my assignment.

API Key: 9QfJTUoG1dIEZLvg3Yu_4bentCky6-mc

Once again, I want to express my heartfelt appreciation for this valuable learning experience. I am excitedly anticipating your feedback and the possibility of joining your esteemed team.

Thank you for your time and consideration.

Best Regards,

Greg Tildis
